Consistent use of the *EService* logo is essential to building strong communications worldwide. The following guidelines graphically illustrate *EService* brand standards and correct usage. Guidelines are provided for colour, spacing, usage and placement.

## Introduction

The *EService* core brand message and attributes are carried through all mediums of communications through the intelligent use of color, typography, photography, and other *EService* brand elements. Proper usage is important to ensure the quality of the experience of every *EService* customer and potential customer.

The brand elements include: The *EService* logo, the *EService* logo with strapline and the glassy E.

The *EService* logo is composed of a glassy E, custom logo-type both with a drop shadow and strapline. These elements are in a fixed position to each other and must never be altered. To ensure legal protectability and to promote proper use, the logo must never be redrawn, condensed, elongated, embellished or altered in any way.

Do not reproduce this logo from anything other than approved final art or approved electronic files. When using the logo on a computer, do not attempt to recreate it yourself as it may be accidentally modified, altered or distorted.

Approved artwork can be obtained via e-mail from the Creative Manager. [gregh@econz.com](mailto:gregh@econz.com)

## ***EService* logo**

The *EService* logo with strapline should be used at all times except when space is an issue. All style guidelines for the *EService* logo should be followed for the *EService* logo without a tagline.

## Tagline Use

Logo visibility is the objective when selecting color. Every part of the logo must be clearly visible.

## Colour Use

Positive logos should be applied to light value backgrounds less than 40% black on the gray scale. Reverse logos are applied to dark value backgrounds more than 50% black on the gray scale. This includes any photographic background providing adequate contrast.

The various colour schematics are detailed below.

### Print Colours

	Name	Pantone® #	C	M	Y	K
	Green	368 2X	84	11	100	2
	Light Grey	429	34	25	30	0

### Print Colours on black

	Name	Pantone® #	C	M	Y	K
	Green	368 2X	84	11	100	2
	Light Grey	429	60	52	30	0

### Web Colours

	Name	Hex #	R	G	B
	Green	009E0F	0	158	15
	Light Grey	ADAFAA	173	175	170

## Colour Use...

### Web Colours on black

	Name	Hex #	R	G	B
	Green	009E0F	0	158	15
	Light Grey	ADAFAA	173	175	170

### Greyscale Colours

	Name	%K
	Green	47
	Light Grey	31

## Proper Color Use

4-color:

4-color reverse on 100% black: no drop shadow

4-color reverse on all other colors:

2-color:

1-color (greyscale):

Logotype usage in animations, video, etc. will be reviewed on a case-by-case basis. If logo is used in a size smaller than 320 x 240 pixel resolution, use the logo without the tagline. Logo may be animated but must hold static for a minimum of 90 frames (3 seconds) either prior to or after the animation is completed. No animation that would distort the logo, i.e. morph, unconstrained scale etc... is allowed.

For more information please contact Creative Manager [greggh@timecard.econz.com](mailto:greggh@timecard.econz.com)

## Logo Use in Animations

To ensure optimum legibility, a clear area surrounding the logo must be maintained. This area is referred to as the “area of isolation”. The minimum area of isolation is derived from the height of the letter “e” in the *EService* logotype. This area is the minimum allowable distance between the signature and all other imagery including: typography, photography, design elements, and page trim. A generous amount of clear space is always recommended.

## Area of Isolation

## Sizes

To promote visual continuity, standard logo sizes have been developed for specific applications. Use these standard sizes whenever possible. They are available from <http://www.econz.com/creative>

Logo for use in larger space applications

Logo for use in small space applications

Minimum size: brand with strapline: 40mm wide

Minimum size: brand no strapline: 22mm wide

## Logo Misuse

The integrity of the *EService* brand is maintained through proper use. Inaccurate reproductions of the logo will erode *EService*'s ability to legally protect it, as well as confuse audiences. Examples of typical logo misuse are demonstrated here. For questions regarding proper logo usage, please contact Creative Manager [gregh@timecard.econz.com](mailto:gregh@timecard.econz.com)

Unacceptable logo usage:

Do not change the relationship between the glassy E, logotype and strapline.

The image shows a distorted version of the EService logo. The 'E' is a thick, 3D-style green letter. The word 'Service' is in a white, italicized, sans-serif font with a grey drop shadow. The 'E' and 'Service' are not properly aligned or spaced, appearing as if they are separate, overlapping elements rather than a unified logo.

## Logo Misuse...

Do not change logotype of logo.

Do not add to logo.

Do not use logotype without the glassy E.

In some circumstances it is inappropriate to use the glassy E. In these cases use *EService* logo with flat E seen here.

## The Flat E

Approved users can download artwork directly from our creative image bank <http://www.econz.com/creative>

For questions regarding proper logo usage, please contact Creative Manager [gregh@econz.com](mailto:gregh@econz.com)

When using the “EService” name in text, use capital letters for the first two letters the smalls, plus italics - *EService*. Do not use all caps or lower case, “ESERVICE” or “eservice” or “*ESERVICE*” or “*eservice*”.

## Use of *EService* in Text

All logo and artwork requests should be directed to the Creative Manager. [gregh@econz.com](mailto:gregh@econz.com)

## Questions

Approved users can download artwork directly from our creative image bank <http://www.econz.com/creative>
